José de Jesús Milian Rivera

Software Engineer · Flutter · Microservices on AWS · Machine Learning

PROFESSIONAL SUMMARY

Software Engineer experienced in cross-platform development with Flutter, microservices on AWS and machine learning model integration. I lead a management and supervision app (Android, iOS and web) running in 1,040 branches of a Grupo Salinas subsidiary. I contributed to Nantlico, the augmented-reality app for Mexico's SEP free textbooks, and led Skin Spectrum, a skin-anomaly detection model with 92% accuracy. I build my own products (MilPDF, Service Orders, Milian POS) and have developed custom software since 2019. I also have experience in mission-critical IT infrastructure: video-surveillance deployment for Mexico's 2024 federal elections (INE) with zero outages.

TECHNICAL SKILLS

Mobile & frontend	Flutter, Dart, TypeScript, JavaScript, Angular, Ionic, HTML & CSS
Backend & cloud	Microservices, REST APIs, AWS (ECS Fargate, RDS), Docker, Kubernetes, CI/CD
Databases	PostgreSQL, MySQL, MongoDB, Firebase, SQLite
AI & augmented reality	TensorFlow Lite, model training and validation, CNN, image processing, AI-assisted development (Claude Code), Unity
Methods & tools	Scrum, Kanban, UML, UX/UI, Git, GitHub, Jira, Azure
Infrastructure & DevOps	Linux (Ubuntu), GitLab CI, SonarQube, Trivy, LAN/WAN networks, Cat6 cabling, CCTV & NVR

PROFESSIONAL EXPERIENCE

Software Auditor (Jr.)

Jun 2026 – Present

Ferrer y Asociados · Assigned to Grupo Salinas · Tlalpan, Mexico City

- I lead the development of an operations management and supervision app used in **1,040 branches** nationwide, with a single Flutter codebase for Android, iOS and web.
- I design and implement the backend with **microservices and REST APIs on AWS** (ECS Fargate and RDS), containerized with Docker and Kubernetes.
- I take part in adopting new technologies and in designing processes (UML) and user experience (UX/UI).

Software Developer & IT Specialist (Freelance)

Jul 2019 – Present

Soporte & Seguridad Amatlán TI · Own business

- Built a **cross-platform point of sale** for a shoe store with 7,200+ items: it removed manual checkout, cut service times and minimized inventory discrepancies.
- Designed and deployed a **queue-management web app** for a law firm that classifies each client by legal need.
- I run infrastructure projects for businesses: networks, Cat6 cabling, service catalogs and support for 30+ computers a month.

Technology Integrator

Jun 2024 – Oct 2025

CONSERTEC · Córdoba, Veracruz

- Led the deployment of **16 IP cameras with NVR** to a private SITE for Mexico's 2024 federal elections (INE), with zero outages and uninterrupted connectivity all day.
- Supervised field technician teams: installation quality, schedule progress and design compliance.
- Trained staff at private companies on their new infrastructure and operating protocols.

FEATURED PRODUCTS AND PROJECTS

Own products · MilPDF, Service Orders and Milian POS

milianriv.github.io

Creator and developer · Flutter · Personal projects

- **MilPDF:** offline PDF tools (merge, reorder, compress, sign, fill text and convert) that process files on the user's device. Web demo available.
- **Service Orders:** system with Kanban board, PDF quotes, CRM, inventory, invoicing and reports for my IT-support business.
- **Milian POS:** v2.0 multi-purpose point of sale (restaurant, pharmacy and retail) with cash control, batches and expiry dates, table map, layaway, ESC/POS thermal printing, backups and licensing, with automated tests.

Nantlico · Augmented reality for Mexico's free textbooks

nantlico.com

Developer · Professional residency 2026 · UTCV, distributed by CONALITEG

- Augmented-reality app (3D models, animations, audio and video) integrated into the SEP's free textbooks and deployed nationwide in basic education.
- Fixed the mobile app's download manager (asset bundles) and built the augmented-reality experience for the web app.
- Validated APK builds before release. My contribution is certified by UTCV, which awarded my degree by exemption.

Skin Spectrum · AI skin-anomaly detection

1 year

Development and machine learning lead · Scientific research project

- Trained a classification model with TensorFlow Lite on 6,000+ images from an international oncology database, reaching **92% accuracy**.
- Led a technical team using Scrum and Kanban to build the cross-platform medical app in Flutter. Demo: milianriv.github.io/SkinSpectrum_v2

EDUCATION

B.Eng. in Software Development & Management

UTCV · 2024 – 2026

Degree awarded by exemption through a federal-level scientific research project.

Associate degree (TSU) in Cross-platform Software Development

UTCV · 2021 – 2024
